## *Chemical Peels*

Chemical peels treat sun damage, fine lines, and acne. Peels range from light (with little or no peeling) to deep (with 3 or more days of peeling expected) to reveal fresher, healthier skin.

- **Alkaline** Offers immediate skin exfoliation with no downtime; combine with a Dermaplane for greater exfoliation.
- **Neo-Peel** Glycolic acid and skin brightening agents that minimize the appearance of skin aging.
- **Mandelic** A peel for the most sensitive skin, reduces redness and leaves the skin refreshed and radiant.
- **Illuminize** A cocktail of fruit acids, this peel will leave your skin glowing and restored.
- **Vitalize** Great for correcting hyperpigmentation and minimizing the effects of sun damage.
- **Rejuvenize** A step above the Vitalize, this peel will address the most stubborn hyperpigmentation, refine pores and stimulate collagen production.
- **Perfect Peel** Contains the antioxidant Glutathione to help repair your skin, lighten acne scarring, refine pores and diminish fine lines.
- **TCA** Medium depth exfoliation to treat more advanced signs of aging or melasma.
- **Hand, Neck & Chest Peels** Restore these often neglected areas, correct photo aging, soften skin and even out skin tone.

## *Hydrafacial™*

Our aesthetics staff will customize a series of infusion-based treatments to reduce fine lines, hyper-pigmentation, uneven skin tone and pore size. This technology combines wet microdermabrasion with pressurized glycolic or salicylic acid in different strengths for a customized treatment.

## *Dermaplane*

This epidermal leveling treatment will exfoliate and remove excess facial hair. Treatment is followed by a customized mask and can be combined with a chemical peel.

## *Eyelash Enhancements*

- **Semi-Permanent Lashes** Lashes come in different lengths and colors and are individually glued to your own lashes for a natural look and feel.
- **Latisse®** Prescription solution that allows lashes to grow longer, thicker and darker.

## *Waxing Services*

We use only Nu-Free wax which provides effective hair removal for the face and body and is safe for all skin types.

## *Massage Therapy*

Our licensed massage therapists have earned the highest level of training and certification in their field.

## *Laser Hair Removal*

Our state-of-the-art Candela Gentlese® & GentleYAG® lasers are the market's most powerful for permanent hair reduction for the face and body, for men and women of all skin types. Our lasers are FDA-approved and can only be used in a medical setting.

## *Collagen Induction Therapy*

Non-ablative treatment, also known as clinical micro-needling, that stimulates the production of collagen thereby reducing wrinkles and improving skin's texture. Serum containing Hyaluronic Acid, Peptides, Vitamins A & C is used during treatment to promote skin renewal. This treatment has minimal downtime and is used for facial rejuvenation and scar reduction.

## *Skin Tightening*

- **Ulthera®** Non-invasive, ultrasound tissue tightening treatment for the face and neck. Ulthera stimulates new collagen formation, lifting and toning loose skin with little or no downtime.
- **Venus Legacy®** Non-invasive treatment for the face and body that uses radio frequency and pulsed magnetic fields to achieve tighter skin, soften wrinkles and reduce cellulite.

## *CoolSculpting®*

FDA-cleared medical device that freezes fat to achieve non-surgical fat reduction, in the office setting, without anesthesia and with minimal to no downtime.
